System Integration: RESTFUL APIs.

System design and analysis.

Version control system (Git & Github)

Project management

OS: Windows, Linux and macOS.

Server: Apache, Windows server (2008, 2012), Linux Server

Database: MySQL, PostgreSQL, MongoDB

Hardware: Networking, Security cameras installation, Telephone installation, Computer maintenance, embedded systems.

Projects

I have worked on many projects of different scale, some of them are:

Electronic Health Management System (eHMS): It is a system that takes control of all the activities/processes that are being carried out in the hospital. It makes the works simple and organized, it keeps the patient records neat and organized over the years. The system can be integrated with other systems such as NHIF systems etc. Some of the hospitals which use eHMS are Bugando, Amana, Lugalo, Kinondoni, Access Medical, Massana Etc.

Warehouse management system: It is a web based system which controls the stock in the warehouse. It keeps records of the items found in the warehouse and current value of the stock, which items are about to be finished and the ones which are totally finished, also it shows which position items are placed in the store and generates reports of the incoming and outgoing items. It is used at SKOL BUILDING CONTRACTORS.

Concrete production management system: It is a web based system which gives report of the production of the concrete, one should select the grade and volume of the concrete he/she has produced on that day and the system will give the amount of cements, aggregates, dust/sand, additive and water that has been used by that production, it also shows the amount of cement, dust, aggregates, additive and water remaining in the store after that production. It is used mainly by the construction companies. It is used at SKOL BUILDING CONTRACTORS.

School Management System: This system automates every activity that is carried out in school, exams grading, reports generation, fee managements, parent module where they can access their students details e.g. results, fee details from anywhere. It is used at Precious Pre and Primary school.

Working Experience

- One year working experience at Advin Tech as a Software Developer.
- One year working experience at GPITG as a Software Developer.
- Worked at SKOL BUILDING CONTRACTORS while I was still a university student as an administrator (trainee).where I was able to develop **warehouse management system** and **concrete production management system**, both of the systems are used by the company till to date with great success.

Personal details

Date of birth: 21-03-1990.

Gender: Male.

Nationality: Tanzanian.

Marital status: Single.

Language known: Swahili, English.

Hobbies: Studying about trending technologies, playing video games, watching football.
